

Il nome Weber è sinonimo di ottimi carburatori, la Tecno 2 distribuisce in Italia i carburatori WEBER riprodotti con le caratteristiche originali, come quelli che venivano costruiti dagli anni '50 e '60 in poi. Sono altresì disponibili tutti i ricambi necessari alle revisioni per riportare a nuovo anche i carburatori d'epoca. Esiste, inoltre, un manuale in lingua inglese intitolato "MANUAL TUNING", dove sono riportate le immagini di tutti gli "esplosi", "viste in trasparenza", tabelle di regolazione ed elenchi dettagliati con i codici dei ricambi. Questi disegni e foto (molto dettagliati) possono essere veramente utili in caso di restauro e nella successiva calibrazione del carburatore. Questo catalogo (WEB-CAT) è ordinabile in Tecno 2. Per molti carburatori speciali (come per esempio: 40/45 DCOE - 48/55 DCO - 40/44/48 IDF) sono già pronti i vari kit completi per le revisioni, questi codici sono riportati al fondo del listino WEBER/Tecno 2.

The Weber name is synonymous of excellent carburetors, Tecno 2 dispense in Italy WEBER carburetors reconstructed with the original features, such as those that were built in the 50's and 60's onwards. Revisions to all parts are also available to carry forward even vintage carburetors. There is also an English-language manual entitled "MANUAL TUNING", which shows pictures of all the "exploded", "see through views", setting tables and list with the codes for spare parts. These drawings and pictures (very detailed) can be really helpful in case of restoration and the next calibration of the carburetor. This catalog (WEBCAT) is ordered in Techno 2. For many special carburetors (for example: 40/45 DCOE - DCO 48/55 - 40/44/48IDF) complete service kits are just in stock, these codes can be found at the bottom of the list WEBER / Techno 2.

[Per la corrispondenza dei codici, visionare le schede "Esplosi Carburatori" nell' area download](#)
